Performance Drivers & Customer Insights

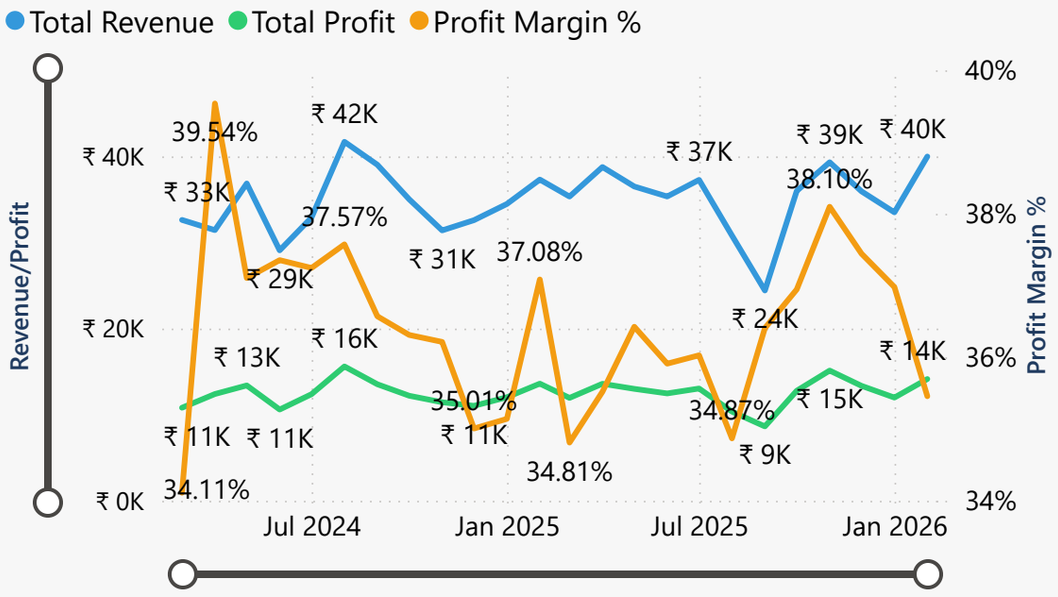

Key Business Insights

Profit Concentration in Few Products:
A small set of products — *Veg Pizza, Paneer Roll, and Chocolate Shake — drive the majority of profits*, indicating strong demand and pricing power in these items.

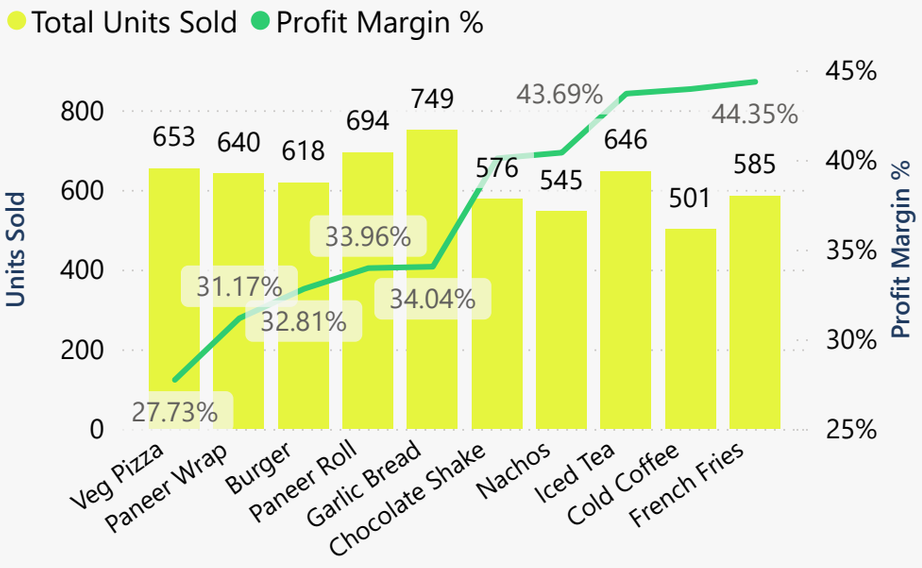

Discounts Impact Margins:
Products receiving *discounts above ~10% tend to show declining profit margins*, suggesting excessive promotions may be eroding profitability without significant sales uplift.

Returning Customers Are More Profitable:
Returning customers generate higher revenue and slightly better margins, highlighting the importance of loyalty programs and retention strategies.
